Building a Healthier Southern Nevada

From Our Residents to Our Economy

By providing a world-class cancer treatment option right here in Southern Nevada, Comprehensive Cancer Centers is proudly contributing to the medical resources available to patients and ultimately the overall well being of our community. We are also contributing to the economic diversification and growth of our market by attracting physicians, specialists and patients from outside the region seeking specialized treatment. Comprehensive Cancer Centers is proud to be a part of our thriving medical community, and its role in the economic growth of Southern Nevada.

OUR SERVICES INCLUDE: Medical Oncology | Hematology | Radiation Oncology
Breast Surgery | Pulmonology & Sleep Disorders | Cancer Genetic Counseling | Diagnostics
Clinical Trials & Research | CyberKnife® Radiosurgery

Centennial Hills Hospital

Centennial Hills Hospital provides a wide range of medical services and procedures. For more than ten years, the hospital has been delivering babies, saving lives and taking care of the hearts of the Northwest and North Las Vegas communities. Centennial Hills Hospital also cares for a wide range of medical situations that arise from accidents at Mount Charleston National Recreation Area, to procedures for spines and joints.

To accommodate the growing community, the hospital recently announced plans for a master plan project that will begin with the build-out of a new, five-story patient tower expansion in 2019. Phase one, valued at an estimated \$95 million, will add 56 patient beds, increasing the total bed count to 318. This addition will provide increased capacity in the Neonatal Intensive Care Unit, Intensive Care Unit, Intermediate Unit and Medical Surgical Units across the hospital. The project will also expand key departments, including inpatient pharmacy, surgical services and the post-anesthesia care unit.

News of the five-story tower expansion comes less than two years after Centennial Hills Hospital completed the final two floors of its eight-story tower, adding 60 private patient rooms and over 200 additional parking spaces. Since 2017, Centennial Hills Hospital

has also added biplane angiography capabilities to treat stroke and other neurosurgical diseases, an advanced Wound Care and Hyperbaric Center and another 12 mother-baby rooms to meet increased demand for maternity services.

The emergency department often serves as its front door, with more than 55,000 patients seen on an annual basis. Major emergencies, such as strokes and heart attacks, as well as minor emergencies are treated at the facility.

Centennial Hills Hospital features a comprehensive women's center offering care for women at every stage of life. The program also supports alternative delivery models including midwifery. Overall deliveries in the past few years exceeded 3,200. Infants who require advanced medical care spend time in the hospital's Level III Neonatal Intensive Care Unit (NICU), and "NICU graduates" are celebrated with an annual reunion at the hospital. Digital mammography and advanced diagnostic testing are also available.

For those who need surgery, a daVinci® Robotic Surgical System can be used for abdominal, gynecological and urological cases. Centennial Hills Hospital also performs over 2,100 orthopedic surgeries per year. This service line is supported by a nurse navigator on the orthopedic nursing unit and the Mako Robotic-Arm Assisted Surgery System, which uses customized technology for total hip replacement, total knee replacement and partial knee resurfacing, and is the only system of its kind in Southern Nevada.

And, for people who may require therapy after surgery, Centennial Hills Hospital offers an outpatient therapy center to assist with the recovery and rehabilitation.

Centennial Hills Hospital is a member of The Valley Health System, an integrated system of care comprised of hospitals, physician practices and outpatient services.

Desert Springs Hospital

Desert Springs Hospital, located just minutes from the famed Las Vegas Strip, McCarran Airport, UNLV and the Thomas & Mack Arena, is well-equipped to handle the many emergencies of both residents and tourists from around the world.

Many of the services at Desert Springs Hospital focus on some aspect of cardiovascular care. Along with advanced cardiovascular services such as open heart surgery and balloon angioplasty, Desert Springs Hospital features a robotic electrophysiology lab, allowing physicians to fix arrhythmias in a minimally invasive matter.

Additionally, the hospital features a major weight-loss (bariatric) surgery program; an inpatient acute rehabilitation unit for patients recovering from a major illness and injury; and a geriatric behavioral health unit for adults 55 and older who need both medical and behavioral assistance. Outpatient services include cardiac rehabilitation, diabetes education, and an advanced wound healing and hyperbaric medicine center, uses specific techniques and 100 percent oxygen therapy, respectively, to heal chronic wounds.

Desert Springs Hospital is a member of The Valley Health System, an integrated system of care comprised of hospitals, physician practices and outpatient services.

Henderson Hospital

Henderson Hospital offers emergency and urgent care services, and a freestanding Emergency department located at St. Rose Parkway and Coronado Center, called ER at Green Valley Ranch that is now open. The maternity department has also opened a Level II neonatal intensive care unit to care for infants who need advanced medical care after birth.

Henderson Hospital was awarded an "A" in Leapfrog Hospital Safety Grade for Fall 2018, and was named Top Hospital by the Leapfrog Group.

Additionally, the hospital offers surgical services, including an ambulatory surgery center located in the adjacent medical office building, cardiovascular services, women's health services and an outpatient wound healing and hyperbaric medicine center.

Henderson Hospital is a member of The Valley Health System, an integrated system of care comprised of hospitals, physician practices and outpatient services.

Mike O'Callaghan Military Medical Center

Mike O'Callaghan Military Medical Center, or the The 99th Medical Group, is a 50-bed Air Force medical center providing medical care and support to maintain the combat readiness of Nellis and Creech Air Force Base personnel. Nellis boasts the Air Force's second largest TRICARE Prime enrollment population of more than 48,500 enrollees. The facility undergoes a comprehensive survey by The Joint Commission (TJC) and is pleased to hold full accreditation status. The last TJC accreditation survey was successfully conducted in January 2018.

In 2011, the Air Force Medical Service upgraded Nellis to a medical center, bringing significant additional resources to the Nellis community.

MountainView Hospital

Since 1996, MountainView Hospital has served the northwest Las Vegas Valley with patient-centered care. Established in one of the fastest-growing areas of the valley, MountainView opened with 120 beds. Today, MountainView has grown to 400 beds. With a dedicated and talented staff of employees and outstanding physicians, MountainView Hospital is recognized for high patient satisfaction and for providing quality and compassionate care to our community for more than two decades.

MountainView features nationally recognized programs including a top cardiovascular and thoracic center, the renowned Las Vegas Institute for Robotic Surgery, an Accredited Chest Pain Center and Certified Stroke Center. Other areas of excellence include emergency care, urology, wound care, obstetrics and gynecological services, orthopedics, vascular care and an inpatient rehabilitation unit.

In 2016, MountainView evolved into a teaching hospital with the launch of the accredited Sunrise Health Graduate Medical Education Consortium, with eight residency programs and two fellowships across three hospital campuses.

From interventional cardiology and electrophysiology, to open heart surgery and minimally-invasive surgery options, such as TAVR, MountainView is leading the way in providing a full-range of diagnostic and treatment options for all areas of cardiac and cardiovascular care. The hospital is home to MountainView Cardiovascular & Thoracic Surgery Associates, the premier comprehensive cardiovascular and thoracic surgery program in Southern Nevada.

MountainView's Las Vegas Institute for Robotic Surgery (LVIRS) is leading the way in the Las Vegas Valley for minimally invasive surgical options for patients. LVIRS offers an extensive panel of surgeons, pairing them with trained staff and nurses, who are part of dedicated robotic teams.

MountainView is home to the latest system in neurosurgery technology that allows surgeons to perform brain and spinal surgeries with targeted precision. MountainView offers a comprehensive neuroscience program, complete with a Joint Commission Certified Primary Stroke Center and surgical services for a number of conditions that impact the brain and spine.

MountainView also serves North Las Vegas with its hospital-based emergency room, ER at Aliante. ER at Aliante is a full-service ER, serving the community of North Las Vegas.

MountainView is a member of the respected Sunrise Health System comprising of Sunrise Hospital, Sunrise Children's Hospital, Southern Hills Hospital and several surgery, urgent care and diagnostic imaging centers offering a complete range of specialized and technologically advanced services.

St. Rose Dominican, Rose de Lima Campus

The journey of St. Rose Dominican - from its inception in 1947 to its remarkable growth that continues today - is one inspired by timeless values. Those values are firmly rooted in the hospital's founders, the Adrian Dominican Sisters, whose even more remarkable legacy of service to the poor, sick and oppressed is a tradition dating back to 12th century France. The Rose de Lima Campus was originally built by the government to service the area plant workers and their families. The Adrian Dominican Sisters purchased the hospital in 1947 for \$1 a year for 25 years.

Today, more than 70 years later, the Rose de Lima Campus completes a two-year transition to a more streamlined campus operations, maintaining a superior quality of care while creating more consolidated, sustainable, and efficient facilities offering emergency services, diagnostic imaging and inpatient care services.

The campus was named after St. Rose of Lima (Peru), who was born in April 1586, and became the first canonized saint of the Americas. Rose strived to follow Catherine of Siena's prayerfulness and dedication to the poor and sick, combining her spiritual life with a life of service to oppressed Indians and African slaves. To this day, she is remembered as a "mother of the poor" in Latin America.

A vital part of the Henderson community, the St. Rose de Lima Campus offers consistent, quality medical services, in keeping with its mission to provide care for all patients regardless of their ability to pay.

As the community's only not-for-profit, faith-based health system, the St. Rose Dominican health system and its nearly 4,000 employees continue the Adrian Dominican Sisters' mission of serving people in need. St. Rose Dominican is a member of the multi-state Dignity Health network of 10,000 physicians, more than 60,000 employees, 41 acute care hospitals and 400-plus care-centers including neighborhood hospitals, urgent care, surgery and imaging centers, home health, and primary care clinics.

St. Rose Dominican, San Martín Campus

The third acute care hospital in the Dignity Health-St. Rose Dominican system, the San Martín Campus opened its doors to serve the needs of the growing community on November 8, 2006. Building on a foundation of seven decades of unparalleled care for the body, mind and spirit in Henderson and Las Vegas, the San Martín Campus takes hospital care in Southern Nevada to the next level. Located on Warm Springs Road in southwest Las Vegas, the hospital has received numerous awards and recognition for its quality care.

The hospital was named in honor of Saint Martín de Porres, a personal friend and counselor to Rose de Lima in the 1600s. His father was Don Juan de Porres, a Spanish Knight, and his mother was Anna Velasquez, a freed woman from Panama of African descent. As a Dominican brother, Martín was known for his ability to provide physical and spiritual care to the sick and poor, including slaves. St. Martín maintained an animal hospital and established an orphanage and hospital for poor children.

The San Martín Campus has many features designed to make patients and visitors feel comfortable and secure. Outside, the cascading waterfall in the Rendina Family Healing Garden creates a calming, relaxed atmosphere while the labyrinth designed by Robert Ferré offers a place for the entire community to find serenity.

As the community's only not-for-profit, faith-based health system, Dignity Health-St. Rose Dominican has been guided by the vision and core values of the Adrian Dominican Sisters since 1947. As the Henderson and Las Vegas communities grow, the St. Rose Dominican health system and its nearly 4,000 employees will continue the Sisters' mission of serving people in need. St. Rose Dominican is a member of the multi-state Dignity Health network of 10,000 physicians, more than 60,000 employees, 41 acute care hospitals and 400-plus care-centers including neighborhood hospitals, urgent care, surgery and imaging centers, home health, and primary care clinics.

Recent Awards/Certifications

- › Best of Las Vegas 2018 – Best Place to Have A Baby Silver Award Winner
- › American Heart Association's Mission: Lifeline® STEMI Receiving Center Silver Recognition Award (2018)

St. Rose Dominican, Siena Campus

To accommodate the growing health care needs of Henderson, Dignity Health-St. Rose Dominican opened its Siena Campus in 2000. The second Dignity Health-St. Rose Dominican acute care hospital in the area enhanced and expanded the services of the original Rose de Lima Campus established in 1947. The Siena campus now serves as a hub for many of St. Rose's tertiary services.

The Siena Campus has been recognized for its quality care, as well as its innovative design. Siena was named the eighth most beautiful hospital in the world by Healthcare Business & Technology in March 2012. The hospital design features amenities including a dramatic, 100-foot bell tower; a healing garden surrounded by lush greenery, fountains and fragrant flowers; tranquil aquariums in waiting rooms; an atrium filled with natural light and soft, soothing music.

The Siena Campus is named after Saint Catherine of Siena (1347–1380), a laywoman who devoted her life to prayer and caring for the sick and poor. Catherine of Siena was canonized in 1461, and named a Doctor of the Church in 1970, which means her teachings are considered relevant for the whole church and for all time.

As the community's only not-for-profit, faith-based health system, Dignity Health-St. Rose Dominican has been guided by the vision and core values of the Adrian Dominican Sisters since 1947. As the Henderson and Las Vegas communities grow, the St. Rose Dominican health system and its nearly 4,000 employees will continue the Sisters' mission of serving people in need. St. Rose Dominican is a member of the multi-state Dignity Health network of 10,000 physicians, more than 60,000 employees, 41 acute care hospitals and 400-plus care-centers including neighborhood hospitals, urgent care, surgery and imaging centers, home health, and primary care clinics.

Southern Hills Hospital

Two-time Best Hospital winner, Southern Hills Hospital provides the communities of southwest Las Vegas with emergency and pediatric emergency services with two ER locations, a behavioral health program, an accredited Chest Pain Center, a Certified Primary Stroke Center, a dedicated orthopedic and spine unit, OB-GYN, Level II NICU, diagnostic imaging, oncology and surgical services. Utilizing advanced digital technology and an accomplished medical staff, Southern Hills Hospital's advanced care and superior service make for better outcomes and an exceptional patient experience.

In 2019 Southern Hills Hospital celebrated the opening of the Pavilion, an 80-bed inpatient unit dedicated to behavioral health treatment for patients age 13 and older, making it the only facility to offer behavioral health services in southwest Las Vegas. Spanning over 45,000 SF, the \$30 million unit features industry-leading technology. Four outdoor patient recreation areas, offer the ability to receive therapy in a comforting outdoor environment.

The hospital is a member of the respected Sunrise Health System consisting of Sunrise Hospital, Sunrise Children's Hospital, MountainView Hospital and several surgery and diagnostic imaging centers offering a complete range of specialized technologically advanced services.

Awards & Accreditations

Southern Hills Hospital is proud to be a part of the southwest Las Vegas community. We strive to bring the highest quality patient care for all who are on our campus including patients, their families, visitors, medical staff, employees and volunteers. With that, Southern Hills Hospital has several awards and accreditations:

- › Voted Best Hospital Gold Award/1st Place 2017
- › Voted Best Cancer Treatment Center Silver Award/2nd Place 2017
- › Voted Best Place to Have a Baby Bronze Award/3rd Place 2017
- › Accredited by The Joint Commission
- › Accredited Chest Pain Center
- › The Joint Commission Certified Primary Stroke Center
- › Get with the Guidelines - Stroke Gold-Plus Quality Achievement Award from American Heart Association/American Stroke Association
- › American College of Radiology (ACR) accredited in MRI, computed tomography, ultrasound and nuclear medicine
- › Awarded three orthopedic certifications from The Joint Commission (hip and knee replacements and hip fracture programs)
- › Earned The Joint Commission certification for Alzheimer's disease program
- › Earned The Joint Commission certification for Sepsis

Spring Valley Hospital

Spring Valley Hospital, located in blossoming Southwestern Las Vegas, cares for thousands of patients each year. To accommodate the growing needs of the region, 72 additional private rooms opened in 2018, increasing capacity to 364 beds.

As a tertiary care facility, Spring Valley Hospital offers advanced medical care in multiple areas. The emergency department uses both chest pain and stroke protocols for the rapid diagnosis, intervention and treatment of these diseases. If necessary, patients can undergo cardiovascular surgery, neurosurgery or even an interventional procedure for large vessel occlusions. Spring Valley Hospital also has the only cardiovascular hybrid OR and ability to perform transcatheter aortic valve replacement (TAVR) within The Valley Health System.

With continued growth in its primary service area, the maternity department delivers over 2,500 babies each year. Parents-to-be arrive through a private Birthplace entrance, and remain within the secure unit from arrival through departure. An antepartum unit is available for high-risk patients. Infants who require advanced medical care spend time in the hospital's level three Neonatal Intensive Care Unit (NICU), and "NICU graduates" are welcomed back to an annual reunion.

Based upon the age and lifestyle of its residents, a wide range of surgeries are available, including orthopedics, spine, general surgery and vascular surgery. With its daVinci® Robotic Surgical System, surgeons use the technology especially for abdominal, gynecological and urology procedures.

And, when patients need additional expertise to recover from a stroke, other major illness, or injury, they can easily transfer to the acute rehabilitation unit. An Outpatient Therapy Center is onsite, offering physical, occupational and speech therapy for adults and children. Additionally, a wound healing and hyperbaric center is also available on the hospital's campus to assist patients with chronic and/or non-healing wounds.

Spring Valley Hospital is a member of The Valley Health System, an integrated system care comprised of hospitals, physician practices and outpatient services.

Summerlin Hospital

As the only hospital in the 36-square-mile master-planned community of Summerlin, Summerlin Hospital, has continually added medical services to benefit more than 100,000 residents in the community and surrounding areas.

Along with emergency and urgent care, Summerlin Hospital features advanced cardiovascular services, cancer and orthopedic care, a robust surgical services program and a Children's Medical Center. The latter includes a separate pediatric emergency department; general and intensive care units; outpatient services for diagnostic procedures; and outpatient physical, occupational and speech therapy.

The Children's Medical Center is a natural complement to the busy maternity department, which delivers nearly 5,000 babies each year. A level three neonatal intensive care unit is readily available for high-risk, medically challenged and/or premature babies, and an annual celebration reunites former patients with staff and physicians.

The cardiovascular program features balloon angioplasty, cardiovascular surgery and other cardiac procedures. Patients may continue their recovery through an outpatient cardiac rehabilitation program.

Cancer services, including surgery and inpatient chemotherapy, are available for both adult and pediatric patients, with specialized nursing units. Several cancer support groups are hosted at the hospital as well.

Patients also benefit from daVinci® Robotic Surgical Systems, which can be used for a myriad of procedures, including gynecological, obstetrical, urological, colorectal and abdominal procedures. Summerlin Hospital also performs a number of orthopedic procedures, offering pre-surgical education, a nurse educator on the orthopedic nursing unit, inpatient acute rehabilitation and outpatient physical and occupational therapy. The acute rehabilitation unit has the Gold Seal of Approval® for Stroke Rehabilitation Certification.

Summerlin Hospital is a member of The Valley Health System, an integrated system of care comprised of hospitals, physician practices, and outpatient services.

Sunrise Hospital & Medical Center and Sunrise Children's Hospital

Sunrise Hospital and Medical Center and Sunrise Children's Hospital offer high quality, patient-centered healthcare to the residents of Southern Nevada, its surrounding region and the millions of visitors that come to Las Vegas.

Sunrise Hospital serves as Nevada's largest acute care facility and Level II Trauma Center, which is located just minutes away from the Las Vegas Strip. On the same campus is Sunrise Children's Hospital, Nevada's largest most comprehensive children's hospital. Together, both facilities offer a full range of services for both children and adults.

The Heart Center at Sunrise Hospital offers the most advanced cardiac care and features an Accredited Chest Pain Center. The Nevada Neurosciences Institute – home to the region's only Joint Commission Certified Advanced Comprehensive Stroke Center – provides world-class care for stroke, epilepsy, multiple sclerosis and other neurological conditions.

We offer Nevada's only pediatric Open Heart program and pediatric Cardiac Intensive Care Unit (CICU) as well as Nevada's largest level III Neonatal Intensive Care Unit (NICU) and Pediatric Intensive Care Unit (PICU). The Breast Center at Sunrise Hospital is the only breast center in Southern Nevada accredited by the National Accreditation Program for Breast Centers (NAPBC). We also feature a certified Cancer Center, a dedicated Pediatric Emergency Department; Southern Nevada's only Accredited Inpatient Rehabilitation Unit; 24/7 in-house Pediatric Intensivists and Obstetricians; and Robotic-Assisted Surgery.

Sunrise Hospital and Sunrise Children's Hospital are members of the respected Sunrise Health System comprising MountainView Hospital, Southern Hills Hospital and several surgery, urgent care and diagnostic imaging centers offering a complete range of specialized and technologically advanced services. For a physician referral or nurse advice, call 702-961-5020.

University Medical Center

Combining highly specialized, exclusive services with the latest breakthroughs in medical technology, UMC offers the highest level of care available in Nevada. In support of the hospital's mission to provide patients with the best possible medical outcomes, UMC offers Nevada's only Level I Trauma Center, only Designated Pediatric Trauma Center, only Burn Care Center and only Center for Transplantation.

Providing care to the community's most critically injured patients, the UMC Trauma Center offers a world-class team of medical professionals who have dedicated their careers to saving lives. Serving patients in a vast, 10,000-square-mile area, the UMC Trauma Center cared for approximately 12,000 patients in 2018 alone.

The UMC Lions Burn Care Center serves as one of only a small number of hospitals to receive verification as a Burn Center from the American Burn Association and the Committee on Trauma of the American College of Surgeons. This achievement recognizes the UMC Lions Burn Care Center's commitment to providing patients with the highest level of burn care.

In recent years, UMC has firmly established its position as a statewide leader in surgical technology, becoming the most sophisticated hospital in Nevada while providing patients with access to cutting-edge procedures and diagnostic tools. UMC recently became the first and only hospital in the state to offer a Pediatric Robotic Surgery Program, utilizing the advanced daVinci® Xi Surgical System to improve young lives.

In 2018, UMC also became the first and only hospital in Nevada to introduce the ExcelsiusGPS robotic navigation platform, allowing for minimally invasive spinal surgeries designed to result in less blood loss, less muscle damage and potentially faster recovery.

UMC's robust health care system also includes Primary Care and Quick Care locations throughout the Las Vegas Valley, providing convenient, accessible health care to community members. To further support the health of Southern Nevada, the hospital offers the Healthy Living Institute at UMC, providing complimentary classes focused on integrative healing practices and evidence-based health care.

UMC continues to grow and evolve to meet the unique needs of the community, implementing a cutting-edge electronic health record system. UMC now utilizes Epic across its campus and off-site clinics, providing new levels of efficiency and convenience to patients. The implementation of Epic allowed UMC to introduce the UMConnect mobile app and website, which allows patients to communicate directly with their doctors, access test results, schedule appointments and request prescription refills, in addition to other valuable tools.

UMC Offers Nevada's Only:

- › Level I Trauma Center
- › Designated Pediatric Trauma Center
- › Burn Care Center
- › Center for Transplantation

Looking Back on 2018

- › **Total ER Visits:** More than 100,000
- › **Quick Care Visits:** Approximately 173,000
- › **Trauma Patients:** Approximately 12,000
- › **Primary Care Visits:** More than 55,000
- › **Admissions:** Approximately 26,000
- › **Surgeries:** More than 15,600

Valley Hospital

Since 1971, the health care professionals of Valley Hospital have prided themselves on providing excellent care to their patients. Located in the heart of the Las Vegas Medical District (LVMD) near the government centers and The Smith Center for Performing Arts, it is the founding hospital of The Valley Health System.

In 2019, Valley Hospital begins its 13th year of providing graduate medical education. As an advanced teaching hospital, Valley Hospital has more than 80 physician residents and fellows working directly with patients. An American Osteopathic Association (AOA) approved graduate medical education program to train and teach future physicians. Under the direction of experienced faculty members, these physicians provide intensified patient care using evidence-based medicine and following clinical pathways that research has shown to be effective with most patients. In 2017, the hospital began its new Pharmacy Residency program. Throughout the year, pharmacy residents will enhance their competency in managing medication-use systems and learn how to support medication therapy outcomes for patients. Besides developing highly qualified pharmacists in Southern Nevada, the residency program helps to bring in talent from other parts of the country to work here.

As a tertiary care facility, Valley Hospital provides advanced cardiovascular, interventional neurological and neurosurgical services. Physicians began performing open heart surgery in the late 1970s. The hospital's continued emphasis on cardiovascular care continues with interventional cardiac procedures including balloon angioplasty, vascular procedures and heart pumps to improve patients' outcomes. Valley Hospital is committed to staying at the forefront of technology. It recently completed Phase 1 of the Cardiology/Cath Lab modernization project. Two Cath Labs now offer advanced technology for both EP and interventional cardiology procedures. Phase II later in the year will include modernizing the patient waiting and check-in areas, and adding a physician and family consultation room.

Meanwhile, neurosurgeons perform complex endovascular and spine surgeries, while interventional radiologists carry out intricate neurological procedures in the biplane angiography lab. Patients who are recovering from a stroke, other major injury or surgery can transfer to the acute rehabilitation unit on the fourth floor for more intensive therapy to aid in their recovery.

A wide range of surgical procedures are also performed at the hospital, with patients benefitting from daVinci® Xi Robotic Surgery Technology used especially for abdominal, colorectal, gynecological and urological surgery. Those requiring inpatient care, are directed to one of several nursing units tailored to their particular post-surgical needs.

As part of the continuum of care, patients and community members can utilize the Advanced Wound Care & Hyperbaric Center for chronic and hard-to-heal wounds. In 2019, the center earned a Center of Distinction designation by Healogics.

Valley Hospital is a member of The Valley Health System, an integrated system of care comprised of hospitals, physician practices and outpatient services.

Established: 1971

Leadership: Claude Wise, *Chief Executive Officer*

Employees: 1,264

Licensed Beds: 306

ER Beds: 53

Address: 620 Shadow Ln., Las Vegas, NV 89106

VA Southern Nevada Healthcare System

VA Southern Nevada Healthcare System (VASNHS) provides outpatient and inpatient medical services to veterans residing in Southern Nevada, within an official catchment area of Clark, Lincoln, and Nye Counties. VASNHS also draws veterans from Arizona, Utah and California.

Primary and Specialty Care services are disbursed among several clinical sites within the Las Vegas Valley, including the Northwest Primary Care Clinic (PCC), Northeast PCC, Southwest PCC and Southeast PCC. A Community Based Outpatient Clinic (CBOC) in Pahrump, Nevada, provides rural health care to veterans residing in Nye County, and the MCPO Jesse Dean Rural Outreach Clinic in Laughlin, Nevada serves veterans in Southern Clark County.

The healthcare system opened a comprehensive medical center in 2012, that provides specialty and inpatient services. Inpatient services include 102 Medical, Surgical, Psychiatric, ICU, Step-Down and Rehabilitation beds. An Emergency Department is located at the medical center. The Southern Nevada Fisher House opened on the main medical center campus in 2016, and provides temporary lodging to families of veterans or active-duty service members undergoing inpatient or extensive outpatient treatment in the Las Vegas Valley.

VASNHS maintains a joint venture with the Department of Defense's 99th Medical Group at the Mike O'Callaghan Military Medical Center (MOMMC). VASNHS also maintains a Community Resource and Referral Center (CRRC) for homeless and at-risk veterans and a Veterans Recovery Center (VRC).

Awards & Accreditations

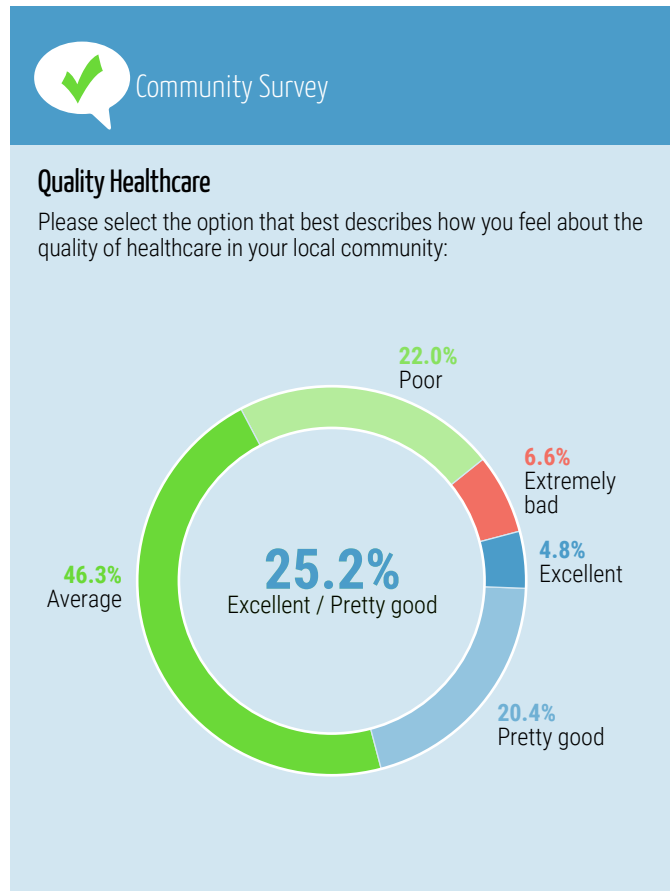

- › VASNHS is accredited by The Joint Commission, Commission on Accreditation of Rehab Facilities (CARF) and The College of American Pathologists
- › Designated a "Leader in LGBTQ Healthcare Equality" by the Human Rights Campaign
- › 2018 recipient of the Competency & Credentialing Institute's TrueNorth Award
- › Selected 2018 Practice Greenhealth Top 25 Environmental Excellence Award. Presented by the nation's leading organization dedicated to environmental sustainability in health care, the award recognizes the top 25 facilities in the United States that are setting the highest standards for environmental practices

10 years. 1 mission.
FIND A CURE.

Thanks to you, we have made great strides in the treatment and awareness of brain diseases. Over the last 10 years, we have conducted more than 70 research studies to find new drug therapies and provided no-cost education and social services support to caregivers. As we look back with gratitude, we realize so much lies ahead. With your help, we will not stop until a cure is found.

CELEBRATING **10 YEARS** 2009-2019

Source: Centers for Medicare & Medicaid Services, Medicare.gov.

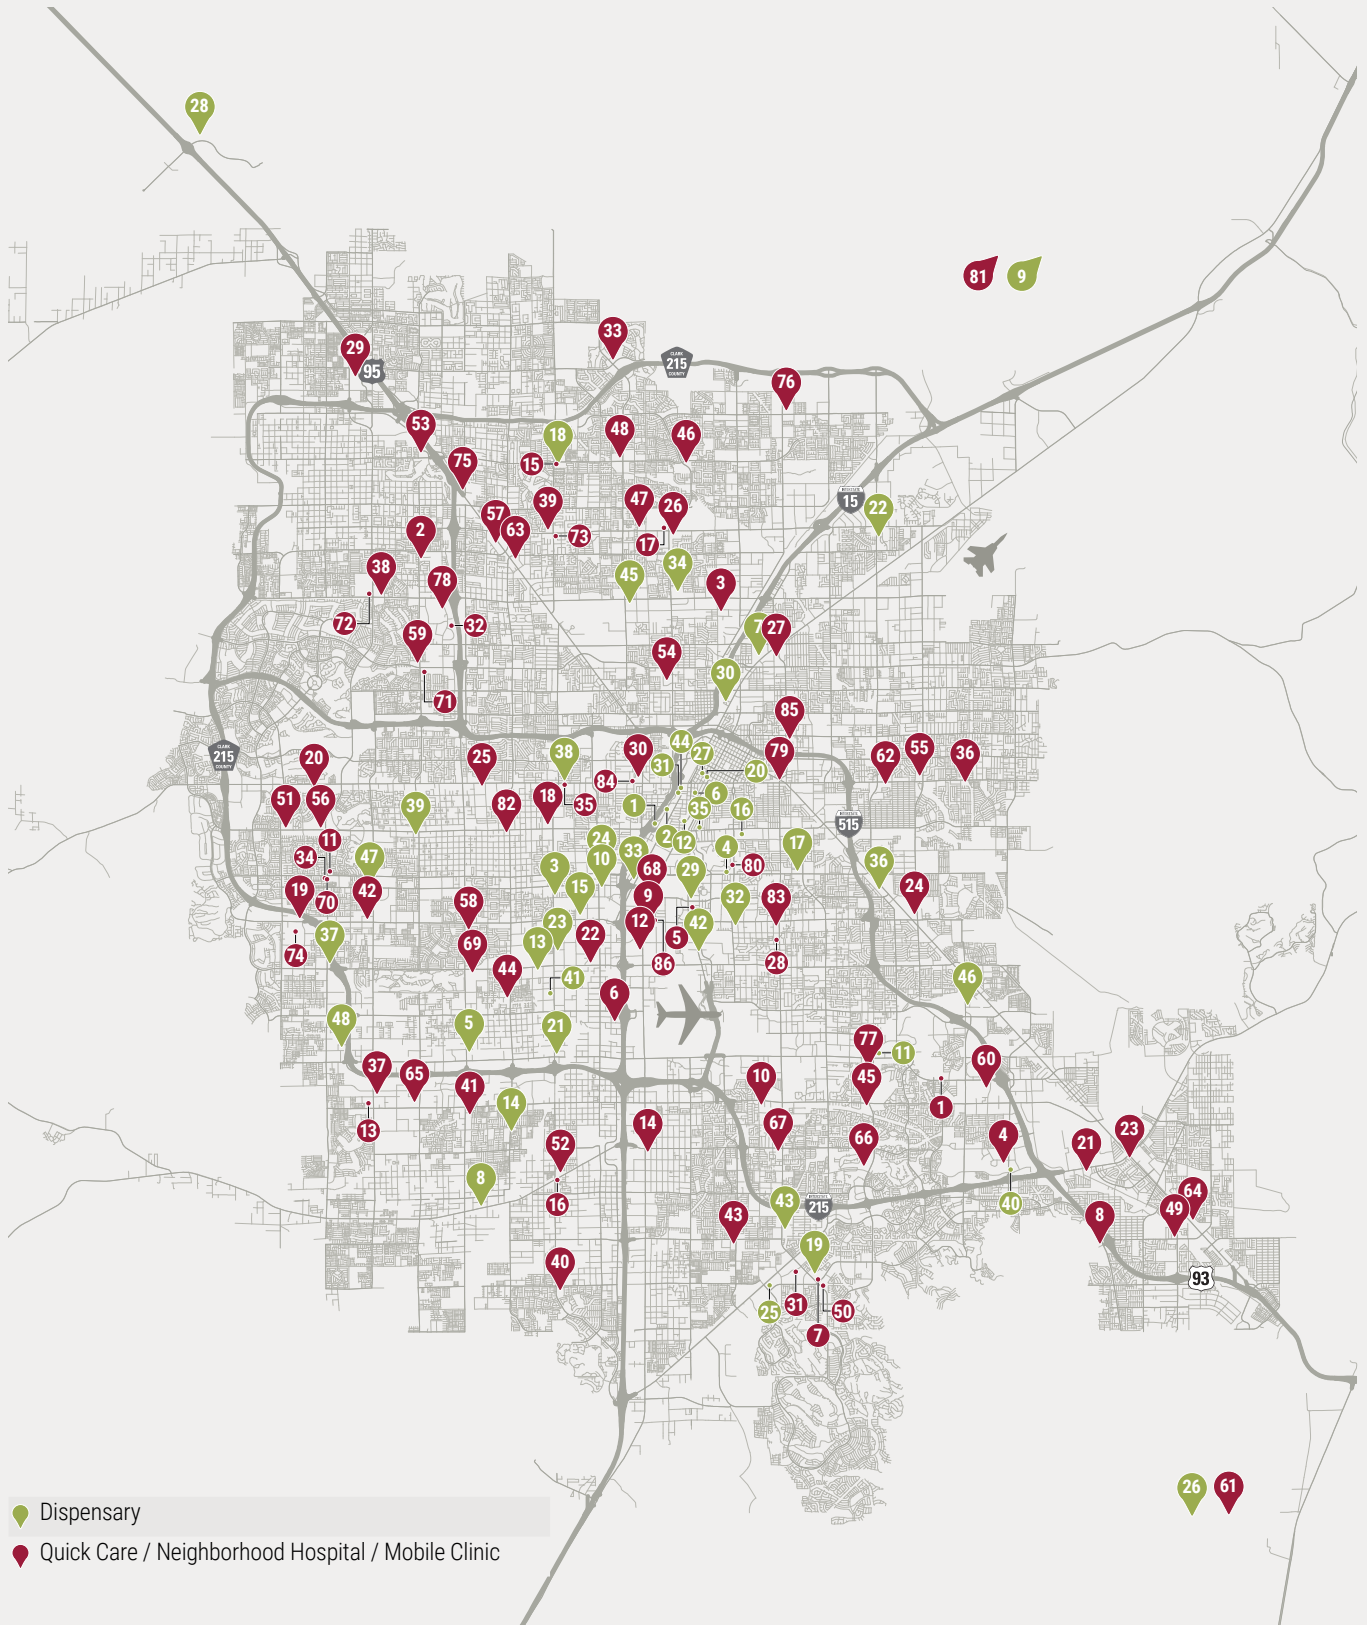

Note: A rating of 1 to 5 stars is given in each category based on the following: Overall Rating - based on the health inspection, staffing, and quality measures ratings combined into one; Health Inspections - based on the nursing home's health inspection results; Staffing - based on the nursing home's staffing hours for Registered Nurses (RNs), Licensed Practical Nurses (LPNs), Licensed Vocational Nurses (LVNs), and Certified Nursing Assistants (CNAs); Quality Measures - based on resident assessment data that show how well the nursing home cares for residents' needs. N/A¹ - Newly certified nursing home with less than 12-15 months of data available. *This facility either didn't submit staffing data, has reported a high number of days without a registered nurse onsite, or submitted data that couldn't be verified through an audit. 1-Much Below Average; 2-Below Average; 3-Average, 4-Above Average, 5-Much Above Average. Data as of March 29, 2019. **New health inspection process and Nursing Home Compare ratings:** The Centers for Medicare & Medicaid Services (CMS) has updated the nursing home health inspection process. The new inspection process began on November 28, 2017. Because of the large number of nursing homes, it will take approximately a year for most nursing homes to be inspected under the new process. As each nursing home is inspected under the new process, a summary of the findings and the full reports from the new inspection process will be available on Nursing Home Compare. However, for approximately one year, the findings from the new inspections won't be used to calculate each nursing home's star rating. Instead, ratings will be calculated using results from surveys that occurred before November 28, 2017. Therefore, the ratings may not reflect the most recent assessment of compliance and quality that exists in a given facility. Results from inspections done under the old process will also continue to be available on Nursing Home Compare. For local calls in the Las Vegas area, dial (702).

Las Vegas HEALS: A Perspective

CEO

What is on the horizon for healthcare in Las Vegas?

Las Vegas is on a journey to becoming the most recognized destination for Global Health & Wellness Travel, a Medical Tourism Destination. Las Vegas HEALS, Las Vegas Convention & Visitors Authority (LVCVA), Las Vegas Global Economic Alliance (LVGEA), UNLV College of Hospitality and the Governors Office of Economic Development (GOED) developed a regional strategic plan, identifying a set of key growth opportunities and recommendations. These planned initiatives for the industry & regional growth are perfectly aligned to develop Las Vegas as a Regional Center of Excellence.

The new UNLV School of Medicine will be enrolling its second class in the summer of 2018, Touro University Nevada recently received approval to expand its class size and Roseman University College of Medicine will soon enter the accreditation process. All are attracting faculty for Graduate Medical Education, expansion which is well underway with new physician residency, fellowship, nursing and specialty programs designed to empower future graduates of our medical schools. These programs will play an integral role in growing a physician workforce to not only cater to the local market but to also attract global medical and wellness travelers.

The Las Vegas Medical District (LVMD), containing two teaching hospitals (University Medical Center and Valley Hospital Medical Center), will become the future home of the UNLV School of Medicine. Meanwhile, in the City of Henderson, the vision of East Side Medical Corridor has progressed by the development of the new Henderson Hospital. Union Village, Henderson Medical Plaza, Gateway Masterplan and Dignity Health's ambulatory facility are all part of that vision.

The new and current infrastructure is essential in helping align our physicians, nurses, allied health professionals and ancillary businesses to participate in creating an integrated healthcare delivery environment in Southern Nevada.

Nevada, and especially Las Vegas, has identified healthcare as a top priority and is executing an ambitious plan with competitive talent along with infrastructure to deliver growth for becoming a global leader in healthcare employment, tourism, innovation as well as research.

Established: 2017

St. Rose Dominican Neighborhood Hospitals

The Dignity Health - St. Rose Dominican Neighborhood Hospitals are comprised of four campuses throughout the Las Vegas Valley.

Each of these small format hospitals have eight ER beds and eight inpatient beds, which are designed to provide patient-centered care with ER wait times of 15 minutes or less. Designed by physicians, the fully licensed acute care hospitals are open 24/7, offering emergency and inpatient care, as well as on-site laboratory and imaging services. Dignity Health opened its first neighborhood hospital in North Las Vegas in 2017, followed by its Blue Diamond Campus, West Flamingo Campus and Sahara Campus. All four campuses are now serving patients throughout Southern Nevada.
