## Introduction

In 2017, the Las Vegas Global Economic Alliance (LVGEA) released a target industry validation study to identify new and emerging industries in Southern Nevada in an effort to diversify the region's economic base. The study identified the following industries as priorities for development over the subsequent five years: Autonomous Systems; Business Headquarters & Services; Emerging Technology; Finance, Banking, & Insurance; Gaming, Tourism, & Conventions; Health Care Services & Medical Education; and Logistics, Manufacturing, & Supply Chain Management. These industries represented the majority of Southern Nevada's total employment.

Since the release of the target industry validation study, much has changed in the state of Nevada. In 2018, the Nevada Governor's Office of Economic Development released *A New Economic Agenda for Nevada* detailing the state's progress since the Great Recession, which has laid a groundwork for future economic development efforts. Likewise, in early 2020, LVGEA released its revised comprehensive economic development strategy (CEDS), outlining Southern Nevada's achievements over the last decade and the opportunities that lay ahead.

Perhaps the most important event since the last target industry validation study is the onset of the COVID-19 pandemic in March 2020, which has reshaped local, regional, national, and international economic systems. Due to the continued importance of tourism to the regional economy, Southern Nevada has been among the most economically impacted metropolitan areas in the United States. Though the region has made significant progress over the last decade in attracting new businesses and industries and growing non-tourism employment, the region remains in need of targeted, intentional diversification efforts.

This updated target industry validation study seeks to provide this intentionality. The current target industries have served the region well over the last five years, and they should continue to play a role in Southern Nevada's efforts to diversify its economy. Nevertheless, a re-examination of the region's target industries is necessary to account for the rapidly evolving industrial environment taking place across the globe, and Southern Nevada must work to capitalize on these changes to fortify its place within the new economy.

The discussion that follows provides an explanation of SRI's methodological approach for identifying new target industries for Southern Nevada. Brief discussions are also provided for each target industry, along with a visualization demonstrating the historical performance of the new target industries and the potential growth patterns between 2021 and 2025. It is important to note that the projected dynamics for 2021 and beyond do not take into consideration ongoing or recently passed federal stimulus programs to alleviate the economic impact of the COVID-19 pandemic. Readers should keep this in mind when assessing the projected performance for each of the new target industries.

## Methodology

SRI employed a mixed-methods approach to identify new target industries for Southern Nevada. SRI's extensive work in the region, beginning in 2018 with the development of a new state economic development plan for Nevada, provided SRI with significant existing knowledge of industry trends and regional ambitions for future growth. Over the course of different projects throughout 2018, 2019, and 2020, SRI engaged many stakeholders in Southern Nevada to discuss the potential for different industries in the region, the capabilities of the region's workforce, the strength of Southern Nevada's education and training institutions, and the dynamism of the region's existing industries. From these discussions, SRI learned several things, including:

- Local and regional development organizations work hard to attract companies in new and emerging industries, such as the advanced manufacturing firm Haas Automation.
- The region's historical strengths in gaming, tourism, and hospitality will continue to drive Southern Nevada's economy for years to come. However, there are growing opportunities for new technology- and skills-intensive industries that build off of this historical strength and position Southern Nevada in the center of next-generation virtual technologies.
- Southern Nevadans are invested in a cleaner and greener future and are intent on being a part of the solution for the world's changing climate.
- Southern Nevada is exceptionally well-positioned to capitalize on emerging areas of unmanned autonomous systems technologies, given the proximity of large military installations and the technology-friendly attitude of local governments.
- While the industry has seen significant growth in recent years, healthcare remains a challenge for the region, a challenge that has been further exacerbated by the COVID-19 pandemic.

While the qualitative data gleaned from stakeholder engagement pointed SRI toward certain industries, quantitative data formed the basis of SRI's analysis. SRI used the Emsi data platform to examine historical data for all industries in Southern Nevada between 2011 and 2020, as well as forecasted growth between 2021 and 2025. Emsi utilizes data from the Quarterly Census of Employment and Wages (QCEW) from the U.S. Bureau of Labor Statistics (BLS) to determine industry change over time. Industries are measured at several different levels of specificity, according to the North American Industry Classification System (NAICS). At the two-digit NAICS level, industries are assessed as the cumulation of their component three-, four-, five-, and six-digit NAICS industries, with industries at the six-digit level being the most specific.

Because Southern Nevada's current and new target industries do not map on to the built-in NAICS industries, SRI analyzed industrial change at the six-digit level. This enabled SRI to capture change occurring at the hyper-specialized level and build new target industries according to changes occurring within related six-digit industries. SRI also consulted existing literature and target industry studies in other regions of the United States to determine how other regions have measured certain industries that do not map on to the existing NAICS industry classifications. For example, many regions have set targets to grow the clean technology industry, but the methods used to define this industry at the six-digit level vary significantly. To account for this variation, SRI reviewed several existing studies of the clean technology industry to determine how it is best defined in the Southern Nevada context.

## Southern Nevada's New Target Industries

The new target industries SRI has identified for Southern Nevada do not mark a radical departure from Southern Nevada's existing target industries. The quantitative and qualitative data indicate that key components of the existing target industries remain relevant to the regional economy. Furthermore, data that capture the impact of the pandemic on regional employment in key industries show that, among the existing target industries, some maintained their employment levels or grew between 2019 and 2020. See the below sidebar entitled "Performance of Southern Nevada's Existing Target Industries" for a detailed discussion of the dynamics of the region's current target industries since 2011.

### Performance of Southern Nevada's Existing Target Industries

The first step in identifying new target industries for a region is to evaluate the performance of the region's existing target industries. This evaluation enables SRI to determine what has worked and what has not worked since the adoption of these targets in 2017. SRI separated its evaluation into two time periods: 2011 to 2019 and 2019 to 2020. By evaluating the pandemic performance of the target industries separately from their growth prior to the pandemic, SRI intends to demonstrate the comparative resiliency of the existing target industries.

Visualizations of the performance of the region's existing target industries can be found in Appendix A. As the graphics demonstrate, as Southern Nevada recovered from the Great Recession between 2011 and 2019, employment in each of the target industries grew by double digits. Cumulatively, the existing target industries grew by slightly less than 30% during this period. In absolute terms, growth was led by Business Headquarters & Services, which added more than 48,500 jobs between 2011 and 2019. Other industries saw in excess of 20,000 new jobs during this time, including Gaming, Tourism, & Conventions (+33,600); Health Care Services & Medical Education (+23,140); and Logistics, Manufacturing, & Supply Chain Management (+22,900). In terms of percentage growth between 2011 and 2019, Emerging Technology (+89%) and Logistics, Manufacturing, & Supply Chain Management (+61%) grew the quickest.

The COVID-19 pandemic, however, introduced significant headwinds for Southern Nevada's economy, and employment in the region's existing target industries fell by nearly 7%. Between 2019 and 2020, employment in Gaming, Tourism, & Conventions shrank by 13%, followed by Business Headquarters & Services (-4%) and Emerging Technology (-1%). Nevertheless, employment in Autonomous Systems (+1%); Finance, Banking, & Insurance (+1.4%); and Logistics, Manufacturing, & Supply Chain Management (+2.3%) continued to grow despite the pandemic, while employment in Health Care Services & Medical Education remained relatively unchanged (-0.2%).

Due to the relatively strong performance of certain existing target industries during the last decade, and in particular during the COVID-19 pandemic, SRI has incorporated these target industries within the new targets, modifying them slightly to better reflect the aspirations and realities of the region's economy in 2021. Overall, four main qualities were assessed to determine industries that may be good targets for Southern Nevada:

- **Stability.** Southern Nevada's historical dependence upon gaming and hospitality has enabled volatility within the regional economy, and any new target industries that region seeks to actively recruit should work to minimize future volatility.

- **Earnings.** Southern Nevada should aspire to attract stable, well-paying industries that provide the region's residents with rewarding, productive, and meaningful work.
- **Job-Rich.** While Southern Nevada should seek to grow emerging and next-generation industries, there should also be a focus on those industries that have established a strong presence in the region and are proven to produce a high number of jobs.
- **Growth in Employment Share.** Any new target industries should also demonstrate a growing role in Southern Nevada's economy, with promising growth in share of the region's overall employment.

Taking into consideration the performance of Southern Nevada's current target industries and the four criteria above, SRI recommends the following target industries for LVGEA:

Target Industry	Component Industries
<b>General &amp; Advanced Manufacturing</b>	General Manufacturing Advanced Manufacturing
<b>Business &amp; Financial Services</b>	Management & Professional Services Business Administration Financial Services
<b>Creative Industries</b>	Creative Professional Services Media Production Media Broadcasting & Distribution Entertainers & Supporting Services
<b>Clean Technologies</b>	Clean Energy Generation Distribution & Wholesale Engineering & Support HVAC & Plumbing Contractors
<b>Transportation &amp; Logistics Technologies</b>	Distribution & Warehousing Transportation & Support Passenger Services Production of Unmanned Autonomous Systems
<b>Information &amp; Communication Technologies</b>	ICT Professional Services Cybersecurity
<b>Healthcare Services</b>	General & Specialist Healthcare Services Hospitals

Target Industry	Component Industries
	Care Facilities
	Healthcare Research & Technologies

While SRI has identified seven target industries, several component industries have also been identified for each target industry. In an approach that differs from the prior target industry validation study, SRI has identified a few key sub-industries that capture changing dynamics within each overall target industry. This approach enables LVGEA to monitor change within a single target industry and focus support on specific components of the target industry that may require additional assistance.

At their aggregate levels, the new target industries have demonstrated promising growth since 2011 with increasing shares of total employment in Southern Nevada (Figure 1 below). Emerging from the Great Recession, the new target industries represented less than 30% of total employment in Southern Nevada. However, by 2020 that proportion had grown to nearly 35%, and forecasts indicate an employment share of nearly 37% by 2025.

The New Target Industries Represent an Increasingly Large Share of the Region’s Employment

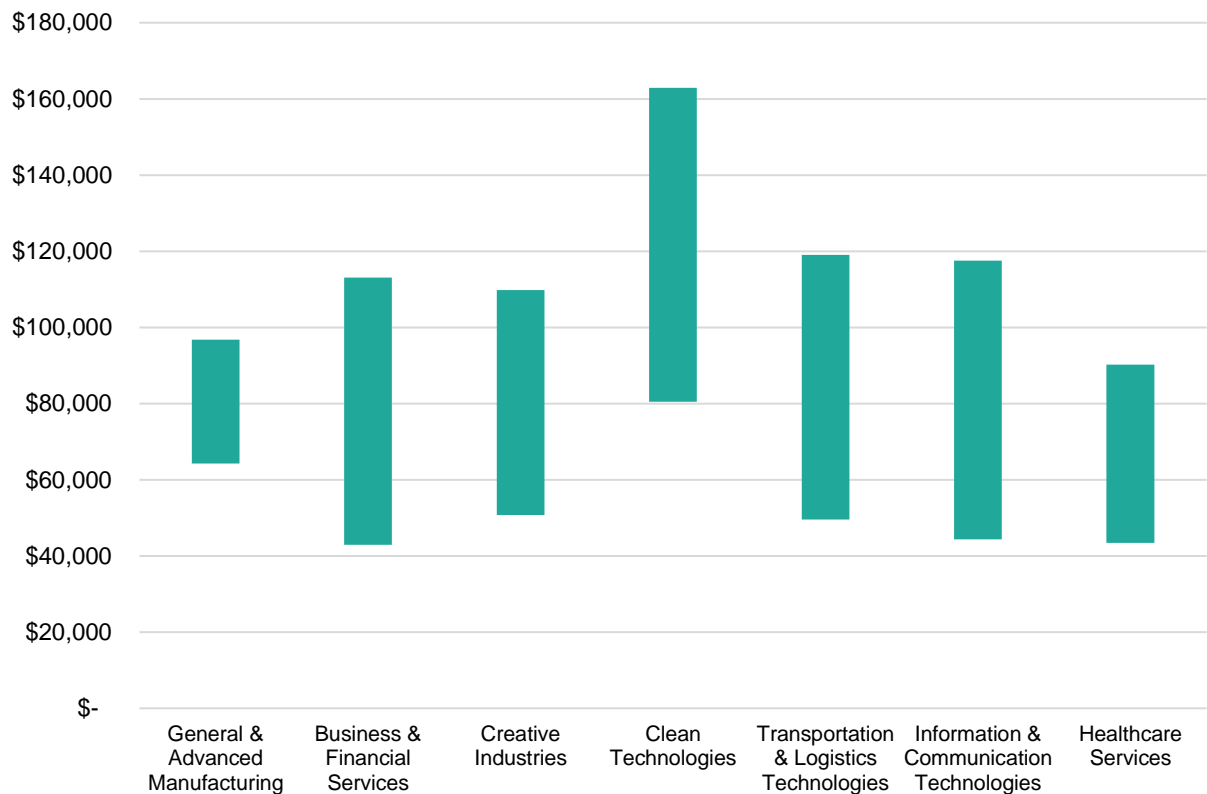

Figure 1: Employment in New Target Industries as a Proportion of Total Employment in Southern Nevada, 2011-2025 (Actual and Projected).

While the target industry validation study for the current set of target industries provides an average income for those employed in each industry, SRI has visualized a range of earnings for the new target industries. This range is decided on the average incomes for each target industry’s component industries, providing an estimate for lower-paying and higher-paying occupations within each target industry. Figure 2 below depicts these earnings ranges.

Figure 2: Range of Earnings for Southern Nevada's New Target Industries.

## General & Advanced Manufacturing

Southern Nevada's strong connections to the Mountain West and major population centers throughout the western United States make it a strong contender for manufacturing firms. In particular, SRI identified two main components of manufacturing that Southern Nevada should monitor and pursue:

- **General Manufacturing**
- **Advanced Manufacturing**

While the industry currently represents about 2.5% of the region's total employment, recent wins, such as the relocation of Haas Manufacturing to Southern Nevada, indicate the region has significant potential to attract general and advanced manufacturing firms. As a relatively higher-paying industry, with average annual earnings of more than \$74,500, the General & Advanced Manufacturing industry provides an opportunity for higher-skill, higher-wage occupations to grow in Southern Nevada.

General Manufacturing	+5,141 (+44%)	\$64,291	Commercial Printing (except Screen and Books) <b>(+430)</b> Sheet Metal Work Manufacturing <b>(+400)</b>
Advanced Manufacturing	+663 (+9%)	\$96,749	Industrial Truck, Tractor, Trailer, and Stacker Machinery Manufacturing <b>(+334)</b> Pharmaceutical Preparation Manufacturing <b>(+258)</b>

## Business & Financial Services

Business & Financial Services has been a consistent engine for growth in Southern Nevada, as evidenced by Figure 4 below. SRI identified three component industries for Business & Financial Services:

- **Management & Professional Services**
- **Business Administration**
- **Financial Services**

While the COVID-19 pandemic adversely impacts employment in this industry, it is expected to recover and surpass 2019 employment by 2023. Future growth is expected to be driven by employment in Financial Services (2011–2019: +15,093) and Management & Professional Services (2011–2019: +17,222), though Business Administration will likely remain the largest component industry within Business & Financial Services.

Management & Professional Services	+17,222 (+55.4%)	\$113,061	Corporate, Subsidiary, and Regional Managing Offices (+8,849)
Business Administration	+7,303 (+14.8%)	\$42,920	Security Guards and Patrol Services (+3,942)
Financial Services	+15,093 (+72.5%)	\$98,562	Real Estate Credit (+964)

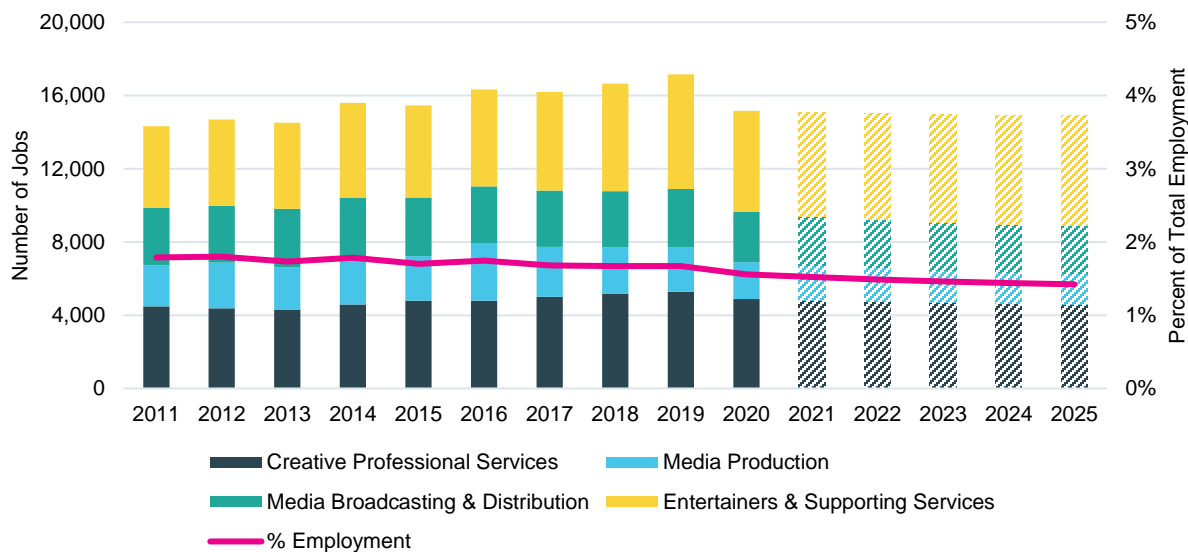

## Creative Industries

Southern Nevada has long been a destination for those working in Creative Industries. While the gaming, tourism, and hospitality industries were the historical “pull” factors that attracted creative workers, Southern Nevada has established itself as a hub for creative talent beyond the Strip. This has led to the emergence of different classes of creative workers, which SRI identified as:

- **Creative Professional Services**
- **Media Production**
- **Media Broadcasting & Distribution**
- **Entertainers & Supporting Services**

While Entertainers & Supporting Services continues to represent a significant portion of those employed in Creative Industries, those working in Creative Professional Services, such as in architectural services (2011–2019: +318) and outdoor advertising (2011–2019: +278), show significant potential as well.

Creative Professional Services	+399 (+8.9%)	\$76,532	Architectural Services <b>(+318)</b>
Entertainers & Supporting Services	+1,051 (+23.5%)	\$109,829	Promoters of Performing Arts, Sports, and Similar Events with Facilities <b>(+581)</b>
Media Broadcasting & Distribution	-415 (-13.5%)	\$50,745	Motion Picture Theaters (except Drive-Ins) <b>(+374)</b>
Media Production	-210 (-9.4%)	\$64,079	Motion Picture and Video Production <b>(+482)</b>

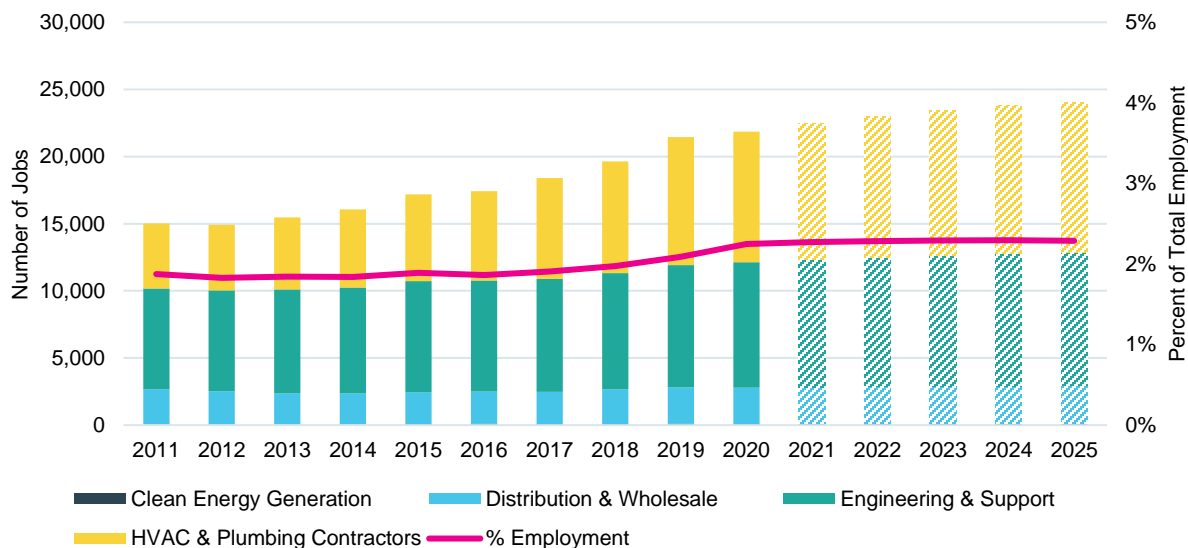

## Clean Technologies

Though rapidly growing across the United States, Clean Technologies remains a loosely defined industry. However, as more states and regions seek to increase the share of clean energy in their energy generation capacity, more concrete definitions of the Clean Technologies industry have begun emerging. In Southern Nevada, four component industries of Clean Technologies were identified:

- **Clean Energy Generation**
- **Engineering & Support**
- **Distribution & Wholesale**
- **HVAC & Plumbing Contractors**

While Clean Energy Generation remains very small (93 total jobs in 2019), supporting industries remain robust. In particular, Engineering & Support saw favorable growth between 2011 and 2019 (21%, or 1,600 jobs) while HVAC & Plumbing Contractors, who install much of the energy- and water-saving technologies throughout Southern Nevada, saw 97% growth (4,680 jobs).

**Figure 6: Employment Change in Clean Technologies Target Industry, 2011-2025 (Actual and Projected).**

**Table 4: Overview of Clean Technologies Target Industry Performance**

	Job Growth 2011–2019	Average Earnings	Fastest Growing Industries

Distribution & Wholesale	+89 (+3%)	\$130,887	Electrical Apparatus and Equipment, Wiring Supplies, and Related Equipment Merchant Wholesalers <b>(+280)</b>
Engineering & Support Services	+1,599 (+21%)	\$108,321	Engineering Services <b>(+858)</b>
Clean Energy Generation	+58 (166%)	\$162,907	Solar Electric Power Generation <b>(+46)</b>

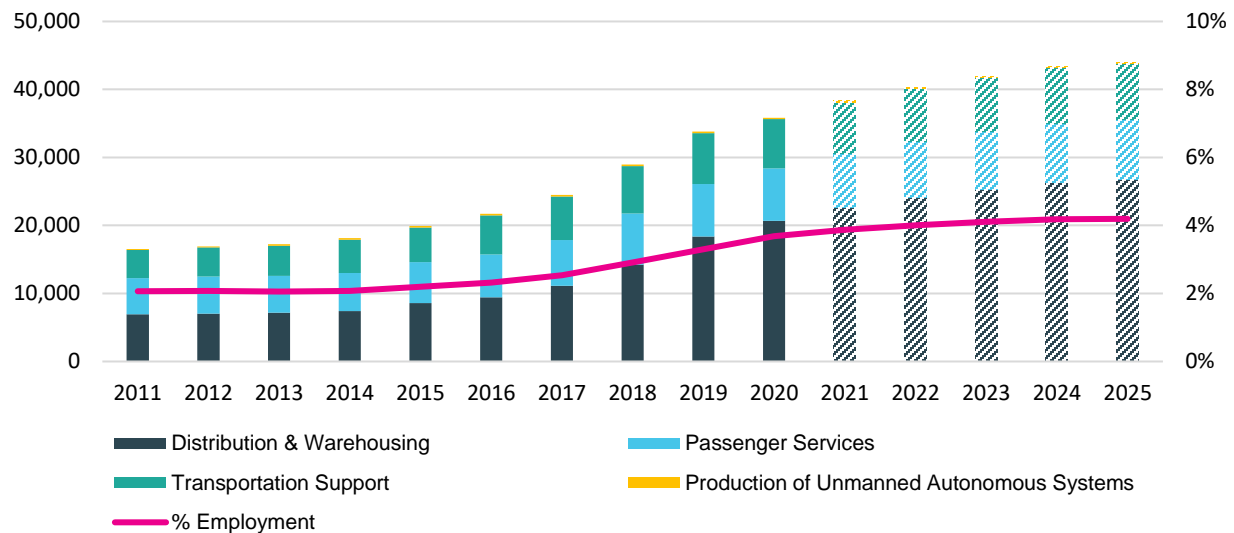

## Transportation & Logistics Technologies

Transportation & Logistics Technologies remains an industry in flux due not only to the COVID-19 pandemic, but also the rapid introduction of new and advanced technologies to the workplace. Considering the increasing technical knowledge required for employment in this industry, SRI identified four component industries for Transportation & Logistics Technologies:

- **Distribution & Warehousing**
- **Transportation Support**
- **Passenger Services**
- **Production of Unmanned Autonomous Systems**

Increasingly, employment in this industry requires a high level of technical knowledge and skill development to work alongside the technologies being introduced. While Production of Unmanned Autonomous Systems (UAS) remains a nascent component of this industry, there is opportunity for Southern Nevada to expand UAS production alongside the growth in transportation and logistics.

**Figure 7: Employment Change in Transportation & Logistics Technologies Target Industry, 2011-2025 (Actual and Projected).**

**Table 5: Overview of Transportation & Logistics Technologies Target Industry Performance**

	Job Growth 2011-2019	Average Earnings	Fastest Growing Industries
<b>Total Transportation &amp; Logistics Technologies</b>	<b>+17,293 (+105%)</b>	<b>\$69,948</b>	
Distribution & Warehousing	+11,434 (+165%)	\$49,574	General Warehousing and Storage (+9,655)
Passenger Services	+2,403 (+45%)	\$119,028	Scheduled Passenger Air Transportation (+2,363)
Transportation Support	+3,362 (+81%)	\$75,202	Other Support Activities for Air Transportation (+1,257)
Production of Unmanned Autonomous Systems	+94 (+65%)	\$89,072	Aircraft Engine and Engine Parts Manufacturing (+102)

## Information & Communication Technologies

Similar to Transportation & Logistics Technologies, Information & Communication Technologies (ICT) has performed strongly in Southern Nevada over the last decade. In Southern Nevada, this industry is comprised of two primary component industries:

- **ICT Professional Services**
- **Cybersecurity**

Growth accelerated significantly after 2011, particularly in ICT Professional Services, driven primarily by the increase in contact centers in Southern Nevada. Overall employment growth in contact centers reached 261% between 2011 and 2019, adding more than 10,000 jobs, and growth remained steady in 2020 during the pandemic.

Aside from the notable growth in contact centers and ICT Professional Services, growth in Cybersecurity-related industries, such as computer systems design services (+1,240 jobs) and software publishers (+778 jobs), is worth noting. These industries tend to be higher-paying and require more advanced education and training credentials.

**Figure 8: Employment Change in Information & Communication Technologies Target Industry, 2011-2025 (Actual and Projected).**

Cybersecurity	+4,251 (+79%)	\$117,513	Computer Systems Design Services (+1,243)
ICT Professional Services	+11,789 (+232%)	\$44,358	Telemarketing Bureaus and Other Contact Centers (+10,562)

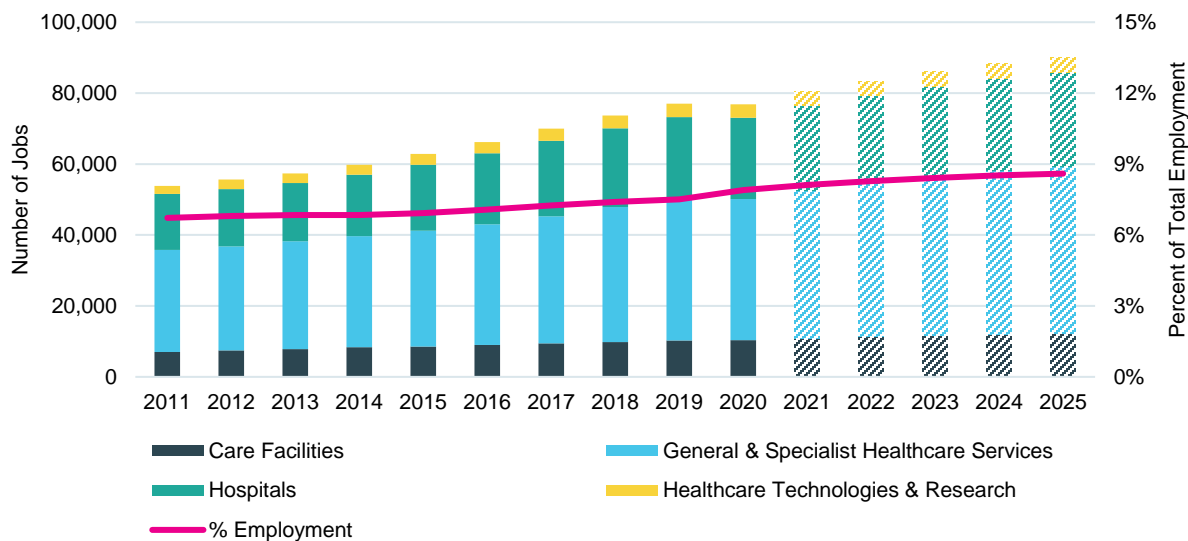

## Healthcare Services

Southern Nevada has long been characterized by an underdeveloped healthcare sector that did not sufficiently meet the needs of the local population. However, the region has made significant strides in growing this industry over the last decade, adding more than 23,000 jobs across four component industries:

- **General & Specialist Healthcare Services**
- **Care Facilities**
- **Hospitals**
- **Healthcare Technologies & Research**

Recent additions to the healthcare education pipeline in Southern Nevada, perhaps most notably the establishment of the UNLV School of Medicine, has increased the capacity of the region to meet its own healthcare workforce needs. This is most evident among growth in the General & Specialist Healthcare Services and Hospitals industries, where employment in physician offices, emergency care, and hospitals has grown substantially since 2011.

## Clean Technologies

Component Industry	NAICS	NAICS Name
Clean Energy Generation	221114	Solar Electric Power Generation
Clean Energy Generation	221116	Geothermal Electric Power Generation
Clean Energy Generation	221111	Hydroelectric Power Generation
Clean Energy Generation	221113	Nuclear Electric Power Generation
Clean Energy Generation	221115	Wind Electric Power Generation
Clean Energy Generation	221117	Biomass Electric Power Generation
Clean Energy Generation	221118	Other Electric Power Generation
Distribution & Wholesale	423610	Electrical Apparatus and Equipment, Wiring Supplies, and Related Equipment Merchant Wholesalers
Distribution & Wholesale	221121	Electric Bulk Power Transmission and Control
Distribution & Wholesale	423690	Other Electronic Parts and Equipment Merchant Wholesalers
Distribution & Wholesale	221330	Steam and Air-Conditioning Supply
Distribution & Wholesale	221122	Electric Power Distribution
Engineering & Support	541330	Engineering Services
Engineering & Support	541380	Testing Laboratories

<b>Engineering &amp; Support</b>	541690	Other Scientific and Technical Consulting Services
<b>Engineering &amp; Support</b>	541620	Environmental Consulting Services
<b>Engineering &amp; Support</b>	541715	Research and Development in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology)
<b>Engineering &amp; Support</b>	541713	Research and Development in Nanotechnology
<b>Engineering &amp; Support</b>	541360	Geophysical Surveying and Mapping Services
<b>HVAC &amp; Plumbing Contractors</b>	238220	Plumbing, Heating, and Air-Conditioning Contractors
